

Dear Western Australians,

My name is Gerard Rennick, and I would like to introduce you to the Gerard Rennick People First Party.

People First is a new party that seeks to put the **Australian people first, always.**

Our point of difference is that we have solutions that will help solve many of Australia's problems, especially the cost of living and home ownership.

Our vision is to return to a free, fair, and united Australia where government serves the people, families thrive, opportunity is shared, and future generations inherit a nation of dignity, prosperity, and hope.

People First aims to promote policies that **empower families** to prosper and create opportunities for their children. We will also demand **greater accountability and transparency** from our bureaucracy, judiciary, and corporations.

By restoring government to its rightful role as the servant of the people, protecting freedoms, strengthening families, fostering opportunity, and safeguarding Australia's sovereignty, environment, and future.

Instead of promoting unity and inspiration, many leaders push divisive ideologies rather than implement pragmatic solutions. This must change.

Australia is a great nation with a proud history of tolerance, resilience, and opportunity — **we owe it to future generations to protect this legacy.**

Gerard Rennick
