

PEOPLE FIRST PARTY

JOIN THE MINOR PARTY WITH MAJOR SOLUTIONS

Dear Australians,

My name is Gerard Rennick, and I'm a former Queensland Senator and the President of People First Party.

People First is a new party. Our point of difference is that we have solutions that will help solve many of Australia's problems, especially cost of living and home ownership.

The aim of People First is to promote policies that **empower families** to prosper and create opportunities for their children. We will also demand **greater accountability and transparency** from our bureaucracy, judiciary, and corporations. Australians are being let down by poor leadership within these institutions of power.

Instead of promoting unity and inspiration, many leaders push divisive ideologies rather than implement pragmatic solutions. This must change.

We aim to implement change by building infrastructure to provide essential services, lower taxes on Australians while increasing taxes on offshore profits and slash government waste.

Australia is a great nation with a proud history of tolerance, resilience, and opportunity — **we owe it to future generations to protect this legacy.**

Gerard Rennick, PFP President
